STORYTELLING

The small diameter movement for daily use

This is our movement for our daily use watches - design to meet the lifestyle requirements of our customers: thickness, precision and reliability.

- Named after the date of the 1st Cartier watch
- Produced by Val Fleurier, only used by Cartier so far
- Created in 2020
- Stronger features than Cartier standards
 - Stronger anti-magnetic resistance of 1700 Gauss
 - Improved power reserve
- 1 hour to assemble the movement and an additional one to case up the movement.
